

### Online Safety

Lots of you have attended Mrs Towers' Online Safety training in the past but I thought it would be useful to reissue information. Websites from CEOP and Thinkuknow have lots more details, if you would like further advice.

- **Talk to your child about what they're up to online.** Be a part of their online life; involve the whole family and show an interest. Find out what sites they visit and what they love about them, if they know you understand they are more likely to come to you if they have any problems.
- **Watch Thinkuknow films and cartoons with your child.** The **Thinkuknow site** has films, games and advice for children from five all the way to 16.
- **Encourage your child to go online and explore!** There is a wealth of age-appropriate sites online for your children. Encourage them to use sites which are fun, educational and that will help them to develop online skills.
- **Keep up-to-date with your child's development online.** Children grow up fast and they will be growing in confidence and learning new skills daily. It's important that as your child learns more, so do you. If you're anything like me, you will have learnt lots of new online skills this year - I had never used Zoom before lockdown!
- **Set boundaries in the online world just as you would in the real world.** Think about what they might see, what they share, who they talk to and how long they spend online. It is important to discuss boundaries at a young age to develop the tools and skills children need to enjoy their time online.
- **Keep all equipment that connects to the internet in a family space.** For children of primary school age, it is important to keep internet use in family areas so you can see the sites your child is using and be there for them if they stumble across something they don't want to see.
- **Know what connects to the internet and how.** Nowadays even the TV connects to the internet. Make sure you're aware of which devices that your child uses connect to the internet, such as their phone or games console.
- **Use parental controls on devices that link to the internet, such as the TV, laptops, computers, games consoles and mobile phones.** Parental controls are not just about locking and blocking, they are a tool to help you set appropriate boundaries as your child grows and develops. They are not the answer to your child's online safety, but they are a good start and they are not as difficult to install as you might think. Service providers are working hard to make them simple, effective and user friendly. Find your service provider and learn how to set your controls.

If you have any other questions about online safety, please feel free to contact Mrs Towers or Mrs Moulton, our lovely information technology experts.
